## **DETAILED ACTION**

### ***Status of Claims***

Claims 1-58 are pending in the application. Claims 1-16, 18, 19, 23-31 and 41-56 are withdrawn from consideration by the Examiner under 37 C.F.R. 1.142 (b) as directed to non-elected subject matter.

### ***Response to Election/Restriction***

Applicant's election with traverse of Group IV, which includes claims 17, 20-22, 32-40 and 57-58 in paper No.7 filed September 16, 2002, is acknowledged. The traversal is on the ground(s) that each of the elected Group could be extended to other Group without imposing a serious burden on the Examiner. This argument is not persuasive because the products of groups I to VIII differ materially in structure and in element from each other and, are capable of supporting their own patents. The wide disparity among the groups requires that many divergent fields must be searched, including all classes and subclasses of U.S. and foreign patents as well as journals and publications. Also, the fields of search are not coextensive. Therefore a separate search considerations are involved, which would impose a burden if unrestricted.

Applicant's next arguments are based on MPEP section 803 and 803.2. However, 35 U.S.C. 121, statutory patent law, is the singular basis for the restriction. The 35 U.S.C. 121 makes clear that restriction may be required in certain applications and that the Director/Commissioner has the right to make such a determination. In addition, the applicant's nowhere present evidence to the contrary that they are claiming independent and distinct inventions.

Art Unit: 1626

For these reasons, applicant's arguments are found unpersuasive and, since 35 U.S.C. 101 allows one patent per invention, the requirement for restriction in Paper No. 6 is still deemed proper and is therefore made FINAL.

Applicants preserve their right to file a divisional on the non-elected subject matter.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17, 20-21, 57 are rejected under 35 U.S.C. 102(b) as being anticipated by Gregory et al (US Pat No. 4,705,799) cited in IDS. Applicant claims an intermediate compound, wherein R<sup>1</sup> is an aryl group, optionally substituted, and R<sup>3</sup> is alkyl, or a salt or hydrate thereof. Gregory et al (US Pat No. 4,705,799) also disclose the synthesis of many oxazolidinyl benzene derivatives, one of which anticipates the instantly claimed compound (STN International, CAPLUS database, page 5, document number, 110, 8198. See also Example 84, column 43 and column 8, lines 5-37 of '799).

***Generic concept***

Based on the election of species in paper No.7 filed September 16, 2002, for a method of preparing an (S)-oxazolidinone, the generic concept is as follows:

A compound of formula as shown in claim 32 wherein:

R<sup>1</sup> is optionally substituted aryl except hetero ring system or atom

R<sup>2</sup> is as claimed except hetero ring system or atom

Art Unit: 1626

R<sup>3</sup> is as claimed

As a result of the election and the corresponding generic concept identified, claims 1-16, 18, 19, 23-31 and 41-56 and the remaining subject matter of claims 32-40 and 58 are withdrawn from further consideration pursuant to 37 CFR 1.142 (b) as being drawn to non-elected inventions. The withdrawn subject matter of claims 1-16, 18, 19, 23-31 and 41-56 is properly restricted as it differs materially in structure and in element from the elected subject matter supra so as to be patentably distinct there from.

#### ***Claim Objections***

Claims 22, 32-40 and 58 are objected to for containing non-elected subject matter. Claims drawn solely to the elected invention as identified supra, would appear allowable. The claims must be amended to exclude non-elected subject matter and within the limit of the elected compound and species and all the dependent claims also, must be amended to satisfy the restriction requirement and election of species in order to place the case in condition for allowance. Appropriate correction is required.
